

## CTI-PRO Voxtron Summer Kits

### Telebutler 2 ports, Eicon Diva Server BRI-2M

TeleButler is a development environment to create your CT (Computer Telephony) applications in a graphical way, by drawing your call flow. You don't have to know anything about programming, no need to learn new complicated systems.

#### Eicon Diva Server BRI-2M

Diva Server BRI-2M is a high-performance, active ISDN adapters that provides both digital and analog connectivity for Basic Rate Interface (BRI). On-board Digital Signal Processors (DSPs) allow one server to support a mix of concurrent communications with ISDN devices, V.90 analog modems, fax machines, and GSM-compatible mobile phones. A mix of call types can be supported simultaneously making it an ideal open communications platform to handle your fax server, unified messaging, computer telephony (CTI) and remote access server needs.

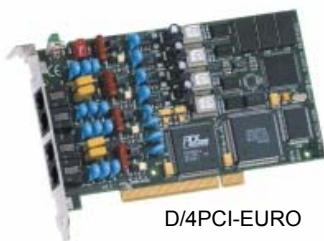

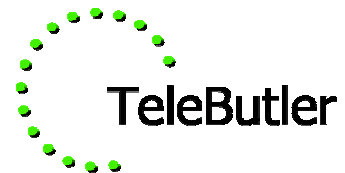

Diva Server BRI-2M

### Telebutler 4 ports, Intel D/4PCI-EURO

TeleButler is a development environment to create your CT (Computer Telephony) applications in a graphical way, by drawing your call flow. You don't have to know anything about programming, no need to learn new complicated systems.

D/4PCI-EURO

#### Intel D/4PCI-EURO

This four-port, half-size DSP-based voice board has four analog line interfaces for use in global markets. Application developers can use it for creating applications for the small- and medium-sized enterprise market, including sophisticated interactive voice response (IVR), 2-12 line voice messaging, and auto attendant applications. The board offers enhanced DSP power and memory capacity that provide a base level of performance for today's requirements as well as the "head room" for future application expansion via software-based technologies.
